

May 21, 2011

Dear Skyline Property Owners Association Members:

Thanks to all who attended the spring banquet that was recently held at UVU. We hope the banquet was enjoyed by all who attended. I am sure that we all look forward to an enjoyable summer & fall in the mountains that we each love so much. As the newly elected President of the Skyline Association Board, this is my first message to the Association membership. I hope to be able to address you via such messages as this one that will be posted to the Skyline Association's website. Please check the website regularly for information & Association updates.

Believe it or not, it is still winter at the Association property. Current access is only available by Snowmobile, SnowCat, Snowshoes & Skis, etc. Based upon snow depths as of today, it would be my best guess that most property owners will not be able to drive into their respective property & cabins until mid June at the earliest this year. For some, it may be late June; depending on the weather and temperatures over the next few weeks. Photos that we took today have been posted to the website for viewing. Hopefully this will give everyone an idea of how much snow still remains at the Association property.

Please do not attempt to drive in earlier than the roads will allow. Traveling into the property during the spring run-off will only do further damage to the roads and will cost the Association additional time and money to repair.

As politely as I can possibly express this fact, we all know that some of our members are increasing in age and others have left us and moved on to the next life. Many of them have been extremely involved with our Association in the past; especially as it relates to roadway maintenance. They have donated substantial hours of their time and untold amounts of their personal money to make our Association function well at an extremely low cost to the membership. We must all come to the realization that those contributions of their time as well as their financial resources will be reduced or will entirely disappear at some time in the future and that the load they have taken upon themselves in the past will have to be picked up by the body of the Association membership. Therefore, everyone needs to do everything possible to minimize the damage to the roads. Waiting to drive into your property until it is feasible to do so is a minimal sacrifice that will reduce damage to the roads and decrease maintenance costs.

Your cooperation in this regard will be greatly appreciated by all members.

Thank you,

Jeff Thomsen

Skyline Association Board President
